

THE K-12 BACK-TO-SCHOOL SOLUTION

Options for Health, Safety, and Security

LiveSafe supports K-12 school districts with daily COVID-19 health screening and reporting capabilities that can be accessed through the industry-leading LiveSafe Mobile App and web platform.

Parents, teachers, and staff members can easily and privately self-report their health status through either a simple check-in feature or by leveraging a privacy-compliant health survey based on CDC guidelines. The LiveSafe Platform also provides school officials reliable and effective two-way safety communications, and the ability to provide resources to their communities in response to rapidly changing health conditions and guidance.

Now more than ever, ensuring the health and safety of your school district is paramount to the success and wellness of your students and their families. It is also the right thing to do for our neighbors and communities.

App Functionality

Daily Health Verification Options

- Choose from either a one touch health check-in feature or embed a self affirmation survey. Based on the responses from parents, LiveSafe returns either a green check indicating that their child is okay to come to school, or a red "X" that indicates their child should stay home, and any other guidance the school wants to include.

Provide Timely Alerts & Mass Communications

- School officials and administrators can leverage the powerful mass communications capabilities of the LiveSafe Platform to issue timely alerts, guidance, and requests for information to school community members regardless of location.

COVID-19 Resources

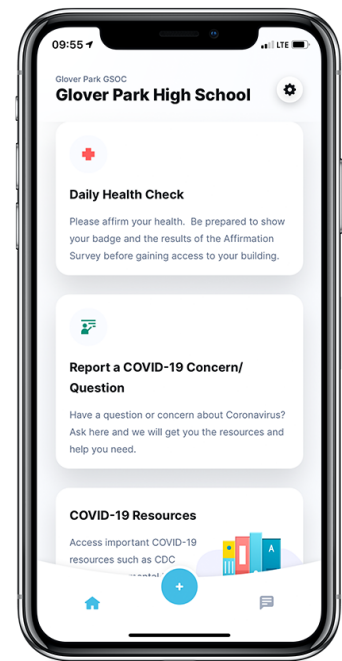

- Provide parents, teachers, and staff easy access to Center for Disease Control and Prevention (CDC) or district-specific resources about Coronavirus policies and procedures, even when an Internet connection is not available.

SafeWalk

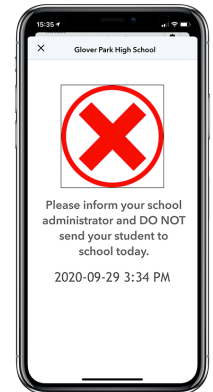

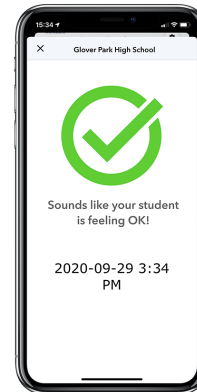

- Allows teachers, staff, and students to invite up to three people to virtually accompany them to their destination.

Emergency Options

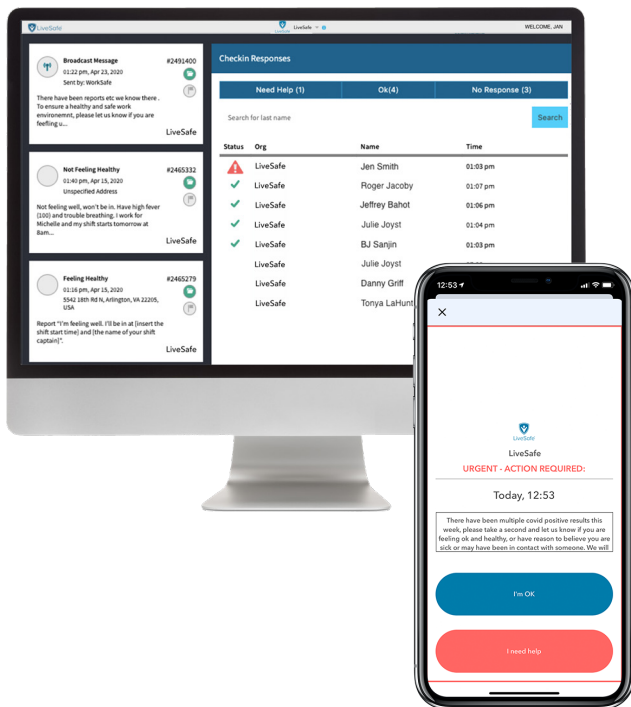

- Have quick access 911 and local emergency services. Onsite safety officials can be contacted by phone or in-app chat. In-app chat enables discreet communications.

Results of health check-ins or COVID-19 screening surveys are date and time stamped, and clearly displayed on mobile device.

Dashboard Functionality

Broadcast Health Check In

- Each school in the district engages their community through their own dashboard.
- All daily health check-ins are automatically routed to the LiveSafe Dashboard, providing an instant view of who is well and who is feeling ill.
- A roster of affected individuals (name, phone, email address, etc.) equips officials to quickly engage if individual follow up is necessary for impacted staff members or families.

Two-Way Chat

- Engage students, parents, teachers, and staff in two-way communications to respond to questions and concerns regarding COVID-19 policies and procedures.
- Build trust among your school community by providing a private and secure channel of communication.
