

SOLUTION BRIEF

LiveSafe Platform for Return to Campus

LiveSafe

THE RETURN TO CAMPUS SOLUTION

Options for Health, Safety, and Security

LiveSafe supports higher education institutions with daily COVID-19 health screening and reporting capabilities that can be accessed through the industry-leading risk intelligence and safety communications platform.

Students, faculty, and staff members can easily and privately self-report their health status through either a simple check-in feature or by leveraging a privacy-compliant health survey based on CDC guidelines. The LiveSafe Platform also provides school safety and risk officials the ability to send reliable and effective emergency broadcast notifications, and provide resources to their communities in response to rapidly changing health conditions and guidance.

Ensuring the health and safety of your school is paramount to the success and wellness of your students and faculty, and protecting your institution's reputation.

App Functionality

Daily Health Verification Options

- Choose from either a one touch health check-in feature or embed a self affirmation survey. Based on the responses from students, faculty, and staff, LiveSafe returns either a green check indicating that the user is okay to come to school, or a red "X" that indicates they should stay home, and any other specific guidance the school wants to include.

Provide Timely Alerts & Mass Communications

- School officials and administrators can leverage the powerful mass communications capabilities of the LiveSafe Platform to issue timely emergency alerts, guidance, and requests for information to school community members regardless of their location.

COVID-19 Resources

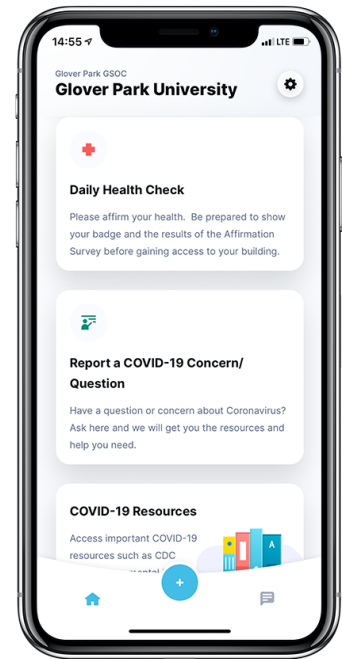

- Provide students, faculty, and staff easy access to Center for Disease Control and Prevention (CDC) or campus-specific resources about COVID-19 policies and procedures, even when an Internet connection is not available.

SafeWalk

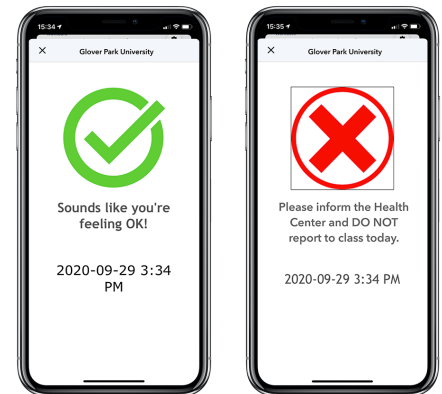

- Allows students, faculty, and staff to invite up to three people to virtually accompany them to their destination, no matter where they are in the world.

Emergency Options

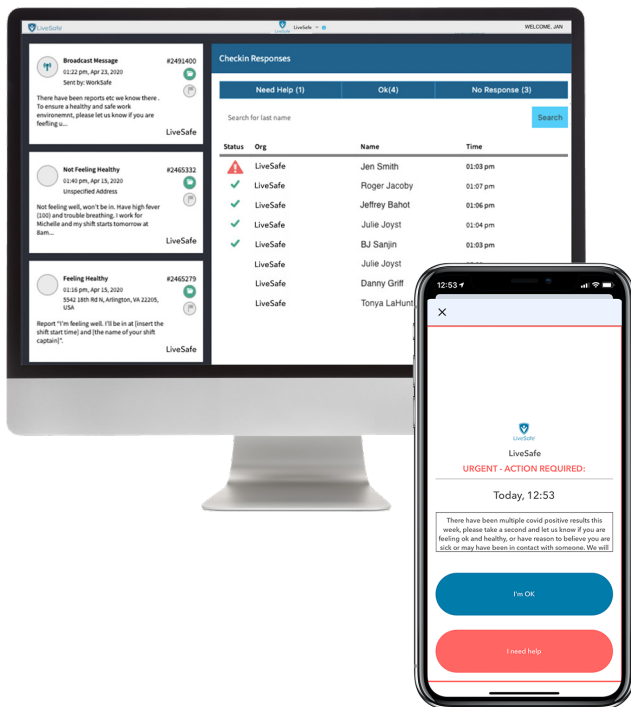

- Have quick access to 911 and local emergency services. Onsite safety officials can be contacted by phone or in-app chat. In-app chat enables discreet communications.

Results of health check-ins or COVID-19 screening surveys are date and time stamped, and clearly displayed on mobile device.

Dashboard Functionality

Broadcast Health Check In

- Each campus engages their community through their own dashboard.
- All daily health check-ins are automatically routed to the LiveSafe Dashboard, providing an instant view of who is well and who is feeling ill.
- A roster of affected individuals (name, phone, email address, etc.) equips officials to quickly engage if individual follow up is necessary for impacted students, faculty, or staff.

Two-Way Chat

- Engage students, faculty, and staff in two-way communications to respond to questions and concerns regarding COVID-19 policies and procedures.
- Build trust among your campus community by providing a private and secure channel of communication.
