

Dartmouth College

DARTMOUTH

The Customer

Dartmouth College is a private Ivy League university in Hanover, New Hampshire with approximately 4,500 undergraduate students. The university has a variety of student groups, including 34 varsity sports teams, 28 Greek chapters, and more than 160 student organizations.

The Situation

Although Dartmouth College has strict alcohol and hazing policies, it appeared that improper behavior was going unreported. The university needed to provide community members with an easy and safe way to share incidents of misconduct, anonymously if they desire.

The Solution

Dartmouth College equipped its students with the LiveSafe Mobile Application, which enabled them to anonymously report unsafe practices such as violations of alcohol and hazing policies.

The Result

External investigators reviewed tips submitted through LiveSafe and conducted independent research that identified five Greek houses and two sports teams in violation of school policies. This allowed Dartmouth College to address incidents of hazing and alcohol use and ensure a safer campus community.

“We want to be sure that our students and organizations are operating safely and within the boundaries of the Standards of Conduct.”

- Diana Lawrence, Associate Vice President for Communications, Dartmouth College
