

# 5 Ways to Use Vector LiveSafe During Inclement Winter Weather

1

## Broadcast Messages

Send broadcast messages to your community to keep them informed.

**Use Case:** Send a broadcast message via text, email, or the Vector LiveSafe Mobile App to notify users of weather-related road closures.

2

## Report Incidents & Suspicious Activity

Inclement weather can lead to injury, facility issues, and other safety and security concerns.

**Use Case:** Users can report safety hazards (ex: black ice) or facilities concerns (ex: frozen pipes) using Tip Submit.

3

## Broadcast Check In

Have members of your community check in on the app so you know that they are safe during hazardous winter weather.

**Use Case:** During dangerous storms, send check-ins to users to ensure community safety.

4

## Geofence

Create geofences around specific locations to ensure you are reaching the people who are at the highest risk for inclement weather.

**Use Case:** During holiday breaks, send messages to users who are still on campus.

5

## Resources

Upload institution-specific inclement weather policies, guidance, and more to the Mobile App's "Resources" section.

**Use Case:** During a storm, users can reference weather-related safety protocols.
