LiveSafe Preparedness Video Guide

1

Broadcast Alerts

Send broadcast messages to your community to inform them of health and safety threats and relevant procedures.

Use Case: Send alerts about safety hazards such as inclement weather via email, text, or push notification.

2

Tip Reporting

Students and faculty can submit reports regarding health or safety concerns and tips will be routed to relevant personnel.

Use Case: If a student is experiencing mental health disruptions, they or a friend or classmate can request help.

3

Check In

Send a check in message to your community so that they can mark whether they are safe during emergencies.

Use Case: Students and faculty can reply to a broadcast check in as "OK" or "Need Help" during an emergency.

4

Geofence

Create geofences around specific locations so that you can send Broadcasts to specific student or faculty groups.

Use Case: During a fire, geofence the areas of highest risk and share location-specific evacuation information.

5

Resources

Upload university-specific, local, and national safety policies and crisis procedures to the "Resources" section of the mobile app.

Use Case: Include COVID-19 testing and isolation guidelines for easy mobile access.
